

There were some issues with making this for me. I was unable to get all of the dates to remain the same. Originally, I had it structured throughout the course of 2 months. A friend put this version on my computer and I was unable to get a good tutorial. After I had it done, I saw the tutorials from the online class page and tried to organize as best as I could. There are “tasks notes” on many of the numbers but not all. Sorry for the disfunction.
